

## RoHS Statement

The RoHS Directive 2011/65/EU of the European Parliament and of the council of 8<sup>th</sup> June 2011 describes the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE).

Any RoHS compliant component is tested for the presence of Lead (Pb), Cadmium (Cd), Mercury (Hg), Hexavalent chromium (Hex-Cr), Polybrominated biphenyls (PBB), and Polybrominated diphenyl ethers (PBDE). For Cadmium and Hexavalent chromium, there must be less than 0.01% of the substance by weight at raw homogeneous materials level. For Lead, PBB, and PBDE, there must be no more than 0.1% of the material, when calculated by weight at raw homogeneous materials. Any RoHS compliant component must have 100 ppm or less of mercury and the mercury must not have been intentionally added to the component. In the EU, some military and medical equipment are exempt from RoHS compliance.

Stontronics Ltd is fully aware of the requirements of RoHS the Restriction of Hazardous Substances and the dates by which various activities must be implemented.

Stontronics Ltd is classed as a downstream user being predominantly a distributor and manufacturer of transformers, power supplies and adaptors and therefore we are not required to pre-register or register our own operations. It is our intention to fully comply with the legal requirements and to lead the way in our industry sector allowing a smooth transition to compliance and the minimum disruption to our customers.

Having carried out investigations into our products and processes we are confident that the products that we supply conform to the RoHS Directive 2011/65/EU.

Should you require further information and help on RoHS please contact;
